Diagnostic Exercises: New Section in the BJVP

In this issue (v.14, n.1, March 2021) we have the pleasure to announce a new section in the BJVP.

In a partnership with the Latin America Comparative Pathology Group (LCPG) the Latin American division of the Davis-Thompson Foundation, we will publish three Diagnostic Exercise each issue.

The Diagnostics Exercises are organized and edited by Prof Claudio Barros and it is a great opportunity for the formation and continuous education of veterinary pathologists.

As editors of the BJVP, we are sure this is what we aim for, bringing excellent, open access scientific content in the field of veterinary pathology.
